EDUCATION

2020 - 2024

ST. PETERSBURG
ELECTROTECHNICAL
UNIVERSITY "LETI"

- Bachelor of Science in Electronics Engineering (Electronics and Nano-electronics)

SKILLS

Languages

- JavaScript (ES6+), TypeScript

Frontend

- Angular, RxJS, NgRx
- Vue.js, Nuxt, Pinia
- HTML5, CSS3, SCSS, Tailwind CSS
- Responsive Web Design, SEO

Backend

- Node.js, Express
- Cloud & Databases
- AWS Lambda, DynamoDB
- Supabase, Firebase

API & Architecture

- REST APIs
- OOP, Functional Programming

PROFILE

Motivated and detail-oriented Junior JavaScript Engineer with hands-on experience building full-stack features using Angular, Node.js, Express, and AWS serverless technologies. Comfortable working on both frontend and backend in large, cloud-based systems, collaborating with cross-functional teams to deliver reliable, maintainable solutions. Passionate about clean code, continuous learning, and using modern tools to work more efficiently

WORK EXPERIENCE

EPAM Systems, Inc.

2025.09 - PRESENT

Junior Javascript Engineer

- Contributes to a large-scale financial platform in a regulated environment, delivering customer account-related functionality.
- Develops **full-stack** features using **Node.js**, **Express**, **Angular**, and **AWS Lambda** in a microfrontend and serverless architecture.
- Works with **AWS** services (**Lambda**, **API Gateway**, **DynamoDB**) for feature implementation, integration, and troubleshooting.
- Performs independent testing and production validation, using **Splunk** for monitoring and issue investigation.
- Collaborates in a distributed, cross-functional environment, working closely with multiple teams to deliver integrated solutions and manage cross-team dependencies.
- Uses AI-assisted development tools to enhance delivery speed, code quality, and documentation, leveraging AI agents.
- Contributes to **Agile/Scrum** ceremonies including estimation, planning, and refinement.

Frontend Intern (Angular)

2025.06 - 2025.09

- Completed an intensive frontend internship focused on Angular development.
- Built a full-featured web application for course creation, editing, and display as a capstone project.
- Worked with Git workflows, feature branching, and code reviews in a team-based environment.
- Used RxJS and NgRx for reactive programming and state management.
- Implemented authentication, route guards, and dynamic routing with Angular Router.
- Developed a responsive UI based on Figma designs.

Testing

- Unit Testing, E2E Testing, Regression Testing

Monitoring & Observability

- Splunk, Grafana

Tools & Workflow

- Git, Jira
- Agile / Scrum

Professional Skills

- Problem Solving
- Teamwork & Collaboration
- Attention to Detail

LANGUAGES

- English (Fluent)
- Russian (Fluent)
- Polish (A2)

HOBBIES

- Roller Skating
- Billiard
- Knitting
- Painting
- Digital art

Personal Projects

Learning purposes

- Personal Portfolio Website (Vue, Nuxt)
 - Built a responsive portfolio website using Vue.js and Nuxt.
 - Applied component-based architecture and modern frontend best practices.
- Octopus TicTacToe (Angular) 
 - Developed a modular TicTacToe web app using Angular, designing a scalable architecture supporting custom board sizes and flexible win-condition logic.
 - Implemented component-based UI and state management for a responsive user experience.
 - Initiated backend integration for multiplayer gameplay, player history tracking, and performance statistics.
- Voicecom Internet Walkie Talkie (Visual Studio)
 - Built a real-time push-to-talk voice communication app using C and TCP/IP.
 - Implemented audio data transmission and low-latency voice capture/playback.
